

Learning Outcome Samples

The following are a list of Learning Outcome examples from accepted abstracts.

By the end of the session, participants should be able to:

1. Define “cross-functional team” and identify the benefits and rationale for their use in modern business
2. Determine pros and cons of various optical cleaning methods
3. Explain 2-3 challenges when leading cross-functional teams.
4. Describe how to gain buy-in by tailoring your efforts to match the purpose and audience
5. Describe what a makerspace is
6. Discuss outcomes through cyber capabilities to better safeguard, secure, and strengthen the security posture of Federal networks
7. Implement design thinking in practical applications.
8. Identify 2-3 methods to update technical skills and engineering working knowledge in preparation to re-enter the STEM workforce
9. Identify opportunities for the implementation of MBSE to better relate complex information and evaluate the value of these applications.
